

gds

How much incorrect terminology does your documentation contain?
And how often do you not notice it until it's too late?

gds authoring assistance

Reliable. Consistent. Efficient.

Everything has been written – but the actual review is only just beginning

Style, terminology and comprehensibility are supposed to be right. But instead of forwarding contents, proofreading begins – a time-consuming and laborious process. In the process, so much can be clarified immediately at the writing stage.

gds authoring assistance checks your texts in real time – automatically while you are writing. Hints relating to spelling, grammar, terminology and style appear immediately and can be applied directly or ignored.

The practical part: The function is included in XR and docuglobe as standard, and can thus be used without additional expense. In docuglobe, there is also a batch review function for contents already generated which checks entire documents at the push of a button – ideal for final review before release.

Writing without detours

The review function is integrated directly into your content management environment. In docuglobe it is performed seamlessly in Microsoft Word. In XR, for XML-based working, it is also available in XMAX. Your writing flow this remains uninterrupted.

In addition, with Congree Control Center Web, a central control system is available – including a user dictionary and dictionary trainer for company-specific terms.

It's time to put an end to corrections loops – make your writing better from the very start.

Whether it be as an extension or a new solution, gds authoring assistance adds quality and efficiency directly to your content management. Contact us for non-binding consultation or test the solution within the scope of a pilot phase.

Linguistic quality of the highest level

The language review is based on comprehensive linguistic rules, and covers German or English. It checks spelling, grammar, terminology, style and sentence length, passive avoidance or nominal style. The integrated TermTiger terminology management adds a central term database to the solution. Flexible imports and exports are possible (TBX, CSV).

Synonyms, variants and inflections are detected automatically, meaning that even complex language variants are reviewed consistently.

Compatibility with multiple languages makes international projects easier, and makes sure that terminology remains consistent worldwide.

You are looking for reliability and sustainability

Technical content management does not require any experiments, but rather stable tools and collaborative support.

gds authoring assistance is based on a technology from our partner **Congree** – tried and tested many times over, stable and with strong support. Congree has many years of experience in linguistic quality assurance, and adds intelligent language review and, if required, integrated terminology management, to our content management systems. gds makes for smooth integration into your content management processes, and, on request, can provide a clearly structured pilot phase. That way, you start with a sound basis and a plan.

Training videos and individual consulting are available to ensure a smooth introduction. Thanks to the continuous further development of Congree technology, your solution remains future-proof. The platform is based on the Congree UCC technology which paves the way to a company-wide solution. This opens up additional options for use – from Outlook, Excel and PowerPoint to browsers. Integration into translation memory systems and the use of a phrase database are also possible.

gds – technical documentation with a future

With over **25 years of experience**, gds delivers solutions that truly fit. With software, services and genuine customer proximity, we make for structured, efficient and future-proof information. Whether it be **docuglobe and XR, easybrowse, complyhub or translation services, CE marking and content management** – our modular range provides support throughout the entire product life cycle. Our solutions adapt to your processes – not the other way around.

As a subsidiary of technotrans SE – an international technology concern – gds is member of a powerful network and higher-profile provider in technical communication. Our solutions optimize processes, create synergies, and set new modern information standards.

Michael Finger, CEO of technotrans SE, puts it best:

“gds is a firmly embedded part of the technotrans Group – even though technical documentation isn’t part of our traditional core business. That’s precisely what makes it so valuable to us: gds brings specialized knowledge in a field that’s becoming increasingly vital across industries [...]. For us, it’s clear: gds is a future-ready company with a strong identity – and a powerful asset within the technotrans Group.“

With gds, you make more of your technical documentation becomes more – today and in the future.

WE ARE ALWAYS THERE FOR YOU

Let’s talk about it. In a personal conversation, we will discuss all of the opportunities available for optimizing and increasing the efficiency of your technical documentation. We will also be happy to visit you.
